EXPERIENCE

MOSAIC AI (YC W25) | ML ENGINEERING INTERN

May 2025 – August 2025 | San Francisco, CA

- Architected and built API for triggering video editing agents, including reliability engineering for AI inference and video processing (also wrote the docs: docs.usemosaic.ai)
- Built scheduler service which handles social media post scheduling and automatic agent runs triggered by new youtube videos on a channel
- Scaled platform to >3000 paying subscribers by managing the twitter account and building an automatic video pipeline for growth marketing.

MIT MEDIA LAB FLUID INTERFACES GROUP | RESEARCHER

January 2025 – Present | Boston, MA

- Training embedding models to create digital twins.
- Building personal AI stacks (data pipelines, on-device inference, hardware integration) to empower users with full control over their own models.
- ML research on fine-tuning and post-training optimization, with a focus on style and reasoning replication.
- Investigating novel approaches in information theory to refine embeddings.

TETRACORP | FOUNDER

August 2025 – Present | Boston, MA

- Founded student-led boutique engineering firm; secured \$500k+ in project contracts in first 4 months from top AI startups. Website: tetracorp.dev
- Building the Github/HuggingFace for AI benchmarks

ROBOCUP | TEAM CAPTAIN

Dec 2022 – July 2023 | Paris, France

- Led team to 1st place finish at Nationals; represented India at the Bordeaux International Round.
- Engineered, programmed, and optimized four autonomous robots using Arduino and Raspberry Pi.

PROJECTS/AWARDS/PUBLICATIONS

REV | PRESIDENT

September 2024 – Present

- Organizing and leading Northeastern and Boston's top builder community with 40 members per cohort.
- Results: \$3m+ ARR, >2m users, 4 YC startups, 6 founding engineers @ YC startups, 1 Shark Tank deal, partnerships with Anthropic, Genesis Fund, Dorm Room Fund, Smithery.ai, and several dozen other companies.

PUBLICATION @ NEUROMONSTER 2025 | NEURONAL COMPUTING

January 2025 – June 2025

- Led research and development of a novel code framework and tool which enables scientists to paint neural cellular automata on a canvas, customize learning parameters and other constraints, and run benchmarking tasks.
- Spotlight presentation @ the Sixth International Conference for the Mathematics of Neuroscience and AI.

ONEMONTH.DEV | AI EDTECH PLATFORM

January 2025 – Present

- Building onemonth.dev (supported by Founders, Inc.), where you can learn anything in 30 days. Currently at >\$2500 cumulative revenue

SHFLA | TURING-COMPLETE MUSIC-TO-FRACTAL LANGUAGE

October 2024

- Created SHFLA, a Turing-complete system mapping musical input to real-time fractal visuals, winning the MIT Media Lab hackathon.

EDUCATION

NORTHEASTERN UNIVERSITY

BACHELOR OF SCIENCE IN COMPUTER SCIENCE AND LINGUISTICS WITH A MINOR IN MATH

Expected April 2027 | Boston, MA

Cum. GPA: 4.0 / 4.0

SKILLS

PROGRAMMING

5+ years:

Python • C • Nim

3+ years:

Go • Typescript

1+ years:

Rust • Fortran • Zig

TECHNOLOGY

Git • Supabase • Linux

PostgreSQL • NextJS • Langgraph

Bash • Pytorch • HPC • MCP

Network protocols • Concurrency

Shadcn • Vercel AI SDK • Typescript

FastAPI • NodeJS • AWS

CUDA • Triton • Tinygrad

COURSEWORK

UNDERGRADUATE

Data Structures and Algorithms

Accelerated Discrete Math

Object-Oriented Design

Calculus III

Advanced Linear Algebra

Graduate-Level Algorithms

Matrix Methods and Machine Learning

Compilers

Real Analysis

Machine Learning and Statistical Learning

Theory 1

Fundamentals of Artificial Intelligence

Networks and Distributed Systems

SOCIETIES

AeroNU Satellite Avionics

Rev Cohort 2; Cohort 4 President

MIT Augmentation Lab

Founders, Inc. Offseason
